Pesticide Certification and Licensing Requirements for Persons/Companies Who Perform Mold Remediation

Presented by

Robby Personette

Program Manager

Pesticide Certification and Licensing
Wisconsin Department of Agriculture,
Trade and Consumer Protection

There are many pesticide products on the market in Wisconsin that are registered to kill/control microbes (disease-causing microscopic pests) on surfaces. Some of these products are labeled only as one or more of the following: germicides, disinfectants, and sanitizers. In Wisconsin, certification and licensing requirements do not apply to applicators using such products.

However, other products have labels that refer to the product being a "*fungicide*" -- such as claiming to kill/control mold and mildew and/or having language such as "fungicide" or "fungicidal" -- and applicators must meet certification/licensing requirements in order to use these products to kill/control mold and mildew.

Be sure that you comply with these requirements by attending this one-hour audio only webinar presented by the Association of Wisconsin Cleaning Contractors (AWCC).

Audio Webinar

The audio webinar presentation will be emailed to you about one week prior to the event, as it will be viewed while on the call. Those registered will call into the conference call line with a "dial in number" and be asked for the pass code. Both the dial in number and the pass code will be emailed to you along with the presentation as confirmation of registration.

Date: Thursday, June 11th

Time: 10:00 am – 11:00 am

Fee: There is no cost for Members to attend this one-hour audio only webinar. The fee for non-members is \$25 per person.

Complete the form below for each person attending the audio webinar and fax to the AWCC office.

AWCC Member Non member

Name: _____

Company: _____

Email (required): _____

Phone: _____ Fax: _____

Non-Members should call the AWCC office at 414-276-9799 to give VISA/Master Card Payment over the phone or send check payment to AWCC.
